

Information and Networking-Café Energy Efficiency in Horizon 2020

Brief Outline – how does it work?

In general, networking events provide an excellent platform for stakeholders coming from various disciplines for discussions around new project ideas. Here, an opportunity is given to future coordinators and project partners to establish new contacts and seed first project ideas. Participation in our “Information and Networking Café Energy Efficiency in Horizon 2020” will give you an opportunity for presenting:

- Your specific idea for an innovative collaborative project on Energy Efficiency in order to find potential project partners, or
- Your expertise and capacity in order to find partners or consortia who may benefit from your knowledge and expertise.

Participants interested in giving a brief presentation are requested to indicate this when they register for the Information and Networking Café here: <https://www.nks-energie.de/ee-infotag2017>. They are asked to submit their presentation to ueb@bayfor.org by 24th February 2017 at the latest.

Due to the limited timeframe, not all participants will be given the opportunity to give a presentation. The organisers reserve their right to select the presentations to be held at the Networking Café. The received presentations may be included in printed event materials and made available to all participants.

Slides (pdf)

- **Maximum of 3 slides per presentation**, submitted in pdf-format
- Contact details (contact person, institution, email, phone)

Content

- **Maximum of 3 minutes for the presentation**
- Clear description of the institution, offered expertise and reference to earlier EU activities
- Clear outlined project idea, expected scope and impact
- Who are your existing contacts? What is your offer to consortia?
- Clear outline what you expect from partners, your expertise and the role you could play in a project
